

Staffing Made Easy are seeking a talented and enthusiastic web developer with a flair for design and attitude to learn to join our team. Whether you're in the early stages of your career or a seasoned professional with significant experience, we're keen to hear from you.

This role requires a solid understanding of front and back-end development, as well as a keen eye for design to create sleek websites, custom applications and integrations, whilst providing technical assistance for the implementation of digital marketing campaigns.

Your thirst for knowledge will ensure you ask questions and research solutions, whilst also bringing your own ideas and contributions to projects.

**About the role:**

This role involves designing, coding, testing and implementing software applications. We are a small business looking for an allrounder that is competent or interested in working with our business ventures. If you have a passion for technology, a strong background in programming, and are a motor vehicle enthusiast...we want to hear from you!

**Tasks & Duties:**

Gather, interpret, and refine client requirements in line with service agreements.

Analyse and assess multiple potential solutions to meet both business and operational needs.

Design and implement features based on user specifications.

Develop clean, secure, and efficient code.

Write and maintain unit and integration tests.

Identify, diagnose, and resolve issues across development, testing, and production environments and processes.

Ensure software adheres to coding standards and architectural design principles.

Actively participate in projects from conception to completion.

Deliver comprehensive, integrated solutions that fulfill business requirements.

**To be selected you must have:**

Bachelor's degree in Computer Science or related field

2+ years of experience in software development

Proficiency in programming languages

Strong problem-solving skills

Excellent communication and teamwork abilities

Capable and willing to work in varied roles
